

JIZ Alloy Wheel Cleaner

A highly effective acid cleaner for the removal of oxidation/rust and tarnishing on aluminium surfaces & ferrous metals. Suitable for truck bodies, alloy wheels, castings etc. Removes brake dust from vehicle wheels and neutralises surface rust. Also used in metal pre-treatment prior to painting and can be utilised as a descaler.

- **Rapid Action**
- **Easily removes road dirt, grime and brake dust.**
- **Safe on most painted surfaces, metals, rubber and lacquered wheels.**
- **Effective in hard and soft waters**
- **Formulated with a powerful, synergistic combination of acids**
- **Biodegrades at low dilutions**
- **Leaves surfaces clean and un-pitted**
- **Does not contain Hydrofluoric Acid**

Application

Truck Body Cleaning: Use at up to 1 to 50 parts water via low pressure, ensuring all correct safety procedures have been adopted. Allow a few minutes contact time and then remove with water jet.

Alloy Wheel Cleaning: Pre-dilute 1:10 in water and brush or trigger spray liberally all over wheels. Allow a few minutes contact time, then rinse well.

Steel/Metal Treatment: Dilute up to 10:1 apply under low pressure or in a dip tank. Allow up to 30 minutes contact time then rinse and treat accordingly.

*Some types of finish are not suitable for treatment with this product.
i.e. Anodised or varnished aluminium*

.TEST ON A SMALL AREA FIRST.

25, 30, 205 and 1000 litre plastic containers
